Nº3 - Friday, July 24th

ULTRAFAST GOES ULTRASMALL

Yesterday, Prof. Maciej Lewenstein gave a captivating plenary talk on the new field of Atto-Nanophysics.

50 YEARS OF CURIOSITY

In a fascinating public lecture on the history of laser science and of its impact on society, Nobel laureate Prof. Serge Haroche made a plain-spoken, compelling case for freedom in fundamental research.

ULTRACOOOL ATOMS

Today, at 11:30, in the Auditorium, Prof. Paul Scheier will take us from the ultrafast to the ultracold with a plenary talk on chemistry close to 0 K.

IUPAP TALK: Do not miss the IUPAP talk by Gretchen Campbell, today at 12:30, in the Auditorium.

A TOUCH OF ROMANTIC UTILITARIANISM

This evening at 19:00, in the Auditorium, Prof. Pedro Miguel Echenique from the University of the Basque Country, San Sebastián, Spain, recipient of the Príncipe de Asturias award, will give the public lecture *La sublime utilidad de la ciencia inútil* (*The sublime usefulness of useless science*), delivered in Spanish with simultaneous translation into English. Attendants will receive a small souvenir of the evening.

"Hertz and Maxwell could invent nothing, but it was their useless theoretical work which was seized upon by a clever technician and which has created new means for communication, utility, and amusement by which men whose merits are relatively slight have obtained fame and earned millions. Who were the useful men? Not Marconi, but Clerk Maxwell and Heinrich Hertz." [Abraham Flexner - 1939]

POST DOCTORAL MARKET III

Looking for a postdoctoral position

SCIENTISTS IN THE MAKING*

At the parallel junior session of ICPEAC, a lively group of young students were given a tutorial on laser by a very special professor, Nobel laureate Prof. Ahmed Zewail.

*The International Science Camp has received economic support by the Spanish Foundation for Science and Technology (FECYT) - Ministry of Economy and Competitiveness and the territorial section of Madrid of the Spanish Royal Society of Chemistry
